Practices	Code Review, Unit & Load Testing, Performance Tuning, Technical Documentation, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior Backend Engineer | Nitx

Oct 2023 - Present | Riyadh, Saudi Arabia

- Design and build back-end services for a multi-product SaaS platform with single sign-on (content management, advertising, and AI design tools) using Laravel and PHP, serving millions of requests per month.
- Improved application speed by 20% through profiling, refactoring, and optimizing inefficient workflows.
- Integrated external REST APIs, including weather services, to extend functionality and data flow.
- Resolve production issues and improve maintainability in collaboration with the team, using Git-based workflows with clean, traceable commits.

Technical Manager | Afaaq Technology

Mar 2020 - Dec 2022

- Managed the technical side of the company and led the development of its products.
- Led the engineering team and set the technical direction for product delivery.

Full Stack Developer | Skilled Tech

Jun 2018 - Feb 2020

- Developed, upgraded, and customized Laravel-based web applications to client requirements.
- Grew web traffic by 25% through SEO, front-end refinements, and performance updates.
- Built reusable code libraries and UI components that reduced repetitive implementation work.
- Improved stability through unit testing, load testing, and fixing recurring issues.

Web Developer | NextGen Startups

Sep 2016 - May 2018

- Started a career in web development, building websites and web applications for early-stage startups.

SELECTED PROJECTS

Nitx Platform: suite of products on one account (SSO): content management for digital screens, an advertising marketplace, and an AI design studio connected to leading AI models.

Exports Valley: B2B marketplace connecting Saudi factories with global importers, with factory storefronts, quotation requests, chat, and subscription plans.

Jabal Omar: API and admin dashboard for the mobile app of a major mixed-use development in Makkah, in Arabic and English.

Pontos: multi-tenant digital loyalty-card SaaS with wallet cards, QR sign-up, reports, and tiered subscriptions.

EDUCATION

Bachelor of Applied Science in Information Systems | Sudan University of Science and Technology | 2017 - 2020
